

Briefing Note on the Warmer Homes Scheme

08.12.2009

The Warmer Homes Scheme is managed by SEAI to assist homes in or at risk of fuel poverty. The scheme is targeted at householders in receipt of the Fuel Allowance payment to help make their home more energy efficient.

This programme provides funding to charitable or not for profit Community Based Organisations for the installation of energy efficiency measures in low income dwellings in their respective geographic areas. There are 22 organisations currently delivering the Warmer Homes Scheme. A full list of these providers and the areas covered is attached to this briefing sheet for your reference. Community Based Organisations work closely with representatives from St. Vincent de Paul, Health Service Executive, Department of Social and Family Affairs and other groups to identify homes in most need of the Warmer Homes Scheme.

The measures provided to eligible homes include the following:

- Attic insulation
- Draught proofing
- Lagging jackets
- CFL bulbs
- Cavity wall insulation where available (14 groups offer this service)

The above measures are provided at a low cost (typically €100) to householders. The rest of the costs are covered by the Warmer Homes Scheme funding. There are no grants paid directly to householders under this scheme.

There are few remaining areas where this scheme is not available at present but SEAI is working to provide nationwide coverage in the near future. SEAI is accepting contact details for householders outside of coverage. These applicants will be contacted when the service is available in their area.

Non-Local Authority Homes constructed before 2002 and in receipt of a Fuel Allowance payment (as part of the National Fuel Scheme) are eligible for the Warmer Homes Scheme. Application for the scheme is directly with the nearest provider or the Warmer Homes Scheme contact details below.

Warmer Homes Scheme: 1800 250 204
