Home energy assessment	✓	✓	
Project management		✓	
Wall and roof insulation	✓	✓	✓
Floor insulation		✓	
Windows	✓	✓	
Heating controls	✓	✓	✓
Heat pump	✓	✓	✓
Solar water heating		✓	✓
Solar electricity		✓	✓
Ventilation	✓	✓	
BER assessment	✓	✓	✓

OSS Contractor Considerations

- Long-term **policy certainty** at EU & National levels (Climate Action Plan, NDP, EU Renovation Wave)
- Long term **financial certainty**, multi annual grants, clarity to 2030
- National enterprise with nationwide impact – not limited to larger towns and cities, **positive for rural economy**
- Considerable interest from wider construction sector, retrofitting is a **stable long-term opportunity**
- SEAI has linked with ETBs and are working with contractors to **develop the labour supply chain**

Stage 1 – Eligibility Criteria

- **Finance and Governance** (Turnover, Tax Compliance, Insurance, Warranties, Standing)
- **Resources** (Competency and Capacity)
- **Quality Assurance** (QMS, Customer Charter, GDPR)
- **Systems** (Secure infrastructure, sufficient processes)
- **Health and Safety** (Statement, Roles and Responsibilities, Procedures)
- **Environmental Management** (Policy, Green Procurement, Waste Management)

Stage 2 – Strategic Plan

1. Vision and Mission for the Organisation
2. SWOT Analysis and Ongoing Risk Management Approach
3. Long-Term Goals and Capacity and Growth Plan
4. Approach to Service Delivery and Project Management
5. Approach to QMS including Technical Quality
6. Resources
7. Data Security, Storage and Disaster Recovery

Tips for a Successful Application

Start with **‘One Stop Shop Operational and Quality Requirements Guide’**

Employ right skills from the start

Applied approach specific to your business, not academic theory

Realistic targets (ambitious but achievable – pipeline development)

Conversion rates from Leads to Quotes to Contracts

Lead generation (marketing and website)

Lead management (resources and CRM)

End-to-end service delivery process diagram (supplement with light text)

Tips for a Successful Application

Assess your cashflow (eg, average €25K grant per project x10)

Risk register (identify raw risk score and residual risk score after actions)

Quality Manager (high level system) vs Technical Manager (quality control)

Standard Operating Procedures (eg, how will you identify, assess, onboard/train good quality sub-contractors?)

GDPR (how will you record and securely store personal data, obtain relevant consents, and only retain for an appropriate period?)

CAPA log (how do you capture, track, escalate, resolve issues/complaints, and continuously improve?)

Application should be in the name of the prospective OSS

Pathway to becoming a OSS

Increase in Demand for Workers

-  **With the amount of work available in the retrofit market, it is clear to me and anyone operating in this sector that there is enough work for people to spend their whole career in the retrofit sector.**
-  **The Irish retrofit market presents a significant opportunity for workers to upskill and advance their careers in a rapidly evolving sector.**
-  **Upskilling in the retrofit market not only offers immediate job opportunities but also long-term career advancement and security as the industry continues to grow in response to global and national sustainability targets.**

About Us

Our Journey

Our One Stop Shop Journey

Early 2022 received invitation to submit application to register

- Evaluate Guidelines
- Examine Our Processes

Passed Stage 1 and Invited to Submit Strategic Plan

- Developed Working Group
- Consulted with SEAI Along The Way

Submitted Strategic Plan and Received Onboarding Training

- Adapted Our Procedures
- Introduced New Procedures

OSS Registration Process

Step One

Pre-Qualification and outline of OSS requirements

- Note Resource Chart and Segregation of Duties
- Clear Chart with all departments listed essential
- N.B. Quality Assurance – ISO9001
- CRM & Field Management Software – Involve software companies credentials

OSS Registration Process

- Step 2 Strategic Plan
- **Vision & Mission** – realistic and relative to Long Term Goals
- **SWOT** – Analyze your company’s position within the industry, market and economy.
- **Risk Management** – How do you deal with risk? Risk Management Policy outlining governance, categories, reporting and appetite
- **Long Term Goals, Capacity & Growth Plan** – SMART plan, Milestones. Analyze your resources and see how they can scale in line with projections.

OSS Registration Process

Step 2 Strategic Plan

- Service Delivery & Project Management – Critical Path and QMS, customer journey (end to end), customer satisfaction monitoring, NPS or equiv.
- QMS & Technical Quality – ISO 9001 or equiv. Training & onboarding = educating teams. Mount Lucas
- Resources – Show how your team(s) is scalable. Understand the correlation between growth across the entire business
- Data Security, Storage & Disaster Recovery – Engage an IT expert and request their credentials

Benefits of becoming an OSS

Process Improvements

- Aligned our marketing with SEAI marketing
- Aligned our customer journey with SEAI OSS journey
- Aligned our QA Procedures with SEAI Quality Team's
- Attended all information sessions and workshops available to remain informed of scheme enhancements

Benefits of becoming an OSS

- Predictable Pipeline
- USP
- Credibility & Trust
- Level Playing Field
- Enhanced Customer Journey
- Increased Customer Satisfaction
