

## Greener Homes Scheme: Registered Product List - Phase III

### Product Type: Solar Collectors

#### **Introduction**

The products on this Registered Product list for Solar Collectors have been tested in accordance with IS EN 12975 (EN 12975-(1,2):2006 Thermal solar systems and components - Solar collectors - Part 1: General Requirements, Part 2: Test methods) and are assumed to be proper materials for the purpose of Part L of the Building Regulations.

However, it should be noted that the dwelling as a whole, incorporating these products, must comply with all Parts of the Building Regulations. Issues of particular relevance where, for example, roof mounted solar panels are fitted may include: weather tightness, fire safety, structural safety etc. Third party certification bodies e.g. NSAI/IAB are available to assess compliance with all parts of the Building Regulations.

When choosing and installing these products in a particular dwelling, necessary maintenance and access for repair or replacement should be fully considered.

In addition, when installing these products, reference should be made to the Irish Code of Practice for Slating and Tiling ICP 2 (2002) and British Standard Code of Practice for Solar Heating Systems for Domestic Hot Water BS 5918 (1989) for guidance on the design considerations to be applied.

Qualified installers may include SEI registered installers, FAS trained plumbers who have completed the renewable technologies module or similar.
